

Maltesh Somasekharappa, is the Director and Co-Founder of Supercraft3D® Pte Ltd which has its registered office in Singapore. His company is involved in design and development of patient specific solutions for pre and post-surgical applications including diagnostic models, surgical cutting guides and implants. Over the last couple of years, Supercraft3D has demonstrated in more than 100 cases the usefulness of application of 3D Printing in the field of medical solutions.

Prior to Supercraft3D, Maltesh was Head of Business Strategy and General Manager at Wipro Enterprises where he established the first metal 3D printing service bureau in India. During this stint he initiated design, development and manufacture of several aerospace and space components using materials like Inconel, Aluminum and Titanium. Some of these parts have been successfully validated as flight worthy and flown to space.

He is a graduate of London School of Economics with a dual master's in law & accounting. In his spare time, he enjoys delving into etymology.
