

Prof. Rajesh Sundaresan  
Dean, Electrical Electronics, and Computer Sciences Division  
IISc

Rajesh Sundaresan received the BTech Degree in Electronics and Communication from the Indian Institute of Technology Madras and the MA and PhD degrees in Electrical Engineering from Princeton University. He then worked at Qualcomm Inc. on the design and development of wireless modems. He joined IISc in 2005, where he is a Professor in the Department of Electrical Communication Engineering and an associate faculty in the Robert Bosch Centre for Cyber-Physical Systems. He has held visiting positions at Qualcomm Inc., the Coordinated Sciences Laboratory of the University of Illinois at Urbana-Champaign, the Toulouse Mathematical Institute, Strand Life Sciences, and the Indian Statistical Institute's Bengaluru Centre. His research interests include decision theory, communication, computation, and control over networks, cyber-social systems, and, more recently, data-driven decision frameworks for public health responses.
